At *14:15 – 16:00*

In *Math 101-*

Dr. Venketasubramanian

will talk about

Some results on genuine representations of double cover of GL(2) - part II

Abstract: This is a second talk in a series on representations of double cover of the p-adic points of GL(2) And SL(2). We will discuss irreducibility of principal series and existence of Whittaker Models for genuine representations of double cover of GL(2). If time permits, Eitan will start his lectures on local Langlands program for covering groups.

Please Note the Unusual Time!
