Automorphic Forms

On Thursday, November ,5 2015

At 14:15 – 16:00

In Math 101-

Dr. Venketasubramanian

will talk about

Some results on genuine representations of double cover of $GL(2)$ - part II

Abstract: This is a second talk in a series on representations of double cover of the p-adic points of $GL(2)$ And $SL(2)$. We will discuss irreducibility of principal series and existence of Whittaker Models for genuine representations of double cover of $GL(2)$. If time permits, Eitan will start his lectures on local Langlands program for covering groups.

Please Note the Unusual Time!
