

# The Department of Mathematics

2017–18–A term

**Course Name** Infinitesimal Calculus 1

**Course Number** 201.1.0011

**Course web page**

<https://math.bgu.ac.il/en/teaching/fall2017/courses/infinitesimal-calculus-1>

**Lecturer** Prof. Eitan Sayag, <sayage@bgu.ac.il>, Office 107

**Office Hours** <https://math.bgu.ac.il/en/teaching/hours>

## Abstract

## Requirements and grading<sup>1</sup>

## Course topics

- .1 Real numbers (axiomatic theory). Supremum and Infimum of a set. Existence of an  $n$ -th root for any  $a > 0$ .
- .2 Convergent sequences, subsequences, Cauchy sequences. The Bolzano-Weierstrass theorem. Upper and lower limits.
- .3 Series. Partial sums, convergent and divergent series, Cauchy criterion. Series of non-negative terms. The root and the ratio tests. Series of arbitrary terms. Dirichlet, Leibnitz, and Abel theorems. Rearrangements of series. The Riemann Theorem.
- .4 The limit of a function. Continuous functions. Continuity of the elementary functions. Properties of functions continuous on a closed interval. Uniformly continuous functions. Cantor's theorem.
- .5 The derivative of a function. Mean value theorems. Derivatives of higher order. L'Hospital's rule. Taylor's theorem.
