

## The Department of Mathematics

2024–25–A term

**Course Name** Linear Algebra for Biotechnology

**Course Number** 201.1.9551

**Course web page**

<https://math.bgu.ac.il/en/teaching/fall2025/courses/linear-algebra-for-biotechn>

**Lecturer** Dr. Natalia Gulko, <gulko@post.bgu.ac.il>, Office מיוס 108

**Office Hours** <https://math.bgu.ac.il/en/teaching/hours>

### Abstract

### Requirements and grading<sup>1</sup>

### Course topics

Complex numbers. Systems of linear equations. Solving linear systems: row reduction and echelon forms. Homogenous and inhomogenous systems. Rank of matrix. Vector spaces. Linearly independent and linearly dependent sets of vectors. Linear combinations of vectors. Inner (dot) product, length, and orthogonality. The Gram - Schmidt process. Matrices: vector space of matrices, linear matrix operations, matrix multiplication, inverse matrix. An algorithm for finding inverse matrix by means of elementary row operations. Rank of matrix and its invertibility. Solving systems of linear equations by means of inverse matrix. Determinants. Condition  $\det A = 0$  and its meaning. Transposed matrix. Eigenvectors and eigenvalues. The characteristic polynomial and characteristic equation. Finding of eigenvectors and eigenvalues. Diagonalization and diagonalizable matrices. Symmetric matrices.
