

The Department of Mathematics

2017–18–B term

Course Name Discrete Mathematics for Communication Engineering

Course Number 201.1.6201

Course web page

<https://math.bgu.ac.il/en/teaching/spring2018/courses/discrete-mathematics-for->

Lecturer Dr. Matan Ziv-Av, <matan@post.bgu.ac.il>, Office מִינוֹס 123

Office Hours <https://math.bgu.ac.il/en/teaching/hours>

Abstract

Requirements and grading¹

Prerequisites: 20119531 Linear Algebra Brief syllabus .1 Operations over sets, logical notation, relations. .2 Enumeration of combinatorial objects: integer numbers, functions, main principles of combinatorics. .3 Elementary combinatorics: ordered and unordered sets and multisets, binomial and multinomial coefficients. .4 Principle of inclusion and exclusion, Euler function. .5 Graphs: representation and isomorphism of graphs, valency, paths and cycles. .6 Recursion and generating functions: recursive definitions, usual and exponential generating functions, linear recurrent relations with constant coefficients. .7 (Optional) Modular arithmetic: congruences of integer numbers, Z_m , invertible elements in Z_m .

Course topics

Prerequisites: 20119531 Linear Algebra

Brief syllabus

- .1 Operations over sets, logical notation, relations.
- .2 Enumeration of combinatorial objects: integer numbers, functions, main principles of combinatorics.

¹Information may change during the first two weeks of the term. Please consult the webpage for updates

- .3 Elementary combinatorics: ordered and unordered sets and multisets, binomial and multinomial coefficients.
- .4 Principle of inclusion and exclusion, Euler function.
- .5 Graphs: representation and isomorphism of graphs, valency, paths and cycles.
- .6 Recursion and generating functions: recursive definitions, usual and exponential generating functions, linear recurrent relations with constant coefficients.
- .7 (Optional) Modular arithmetics: congruences of integer numbers, \mathbb{Z}_m , invertible elements in \mathbb{Z}_m .
