

## The Department of Mathematics

2024-25-B term

**Course Name** Introduction to Statistics A

**Course Number** 201.1.9421

Course web page

https://math.bgu.ac.il//en/teaching/spring2025/courses/introduction-to-statistic

Lecturer Dr. Matan Ziv-Av, <matan@post.bgu.ac.il>, Office מינוס 123

Office Hours https://math.bgu.ac.il/en/teaching/hours

## **Abstract**

## Requirements and grading<sup>1</sup>

## Course topics

.1 Descriptive statistics: organizing, processing and displaying data. .2 Sampling distributions: Normal distribution, the student t-distribution, Chi-Square distribution and Fisher's F-distribution .3 Estimation: A point estimate and Confidence Interval of population parameters: Mean variance and proportion. Tolerance interval. .4 Testing hypothesis about a population's parameters: Mean, variance and proportion. .5 Evaluating the properties of a statistical test: errors, signflicance level and power of a test. .6 Testing hypothesis about equality of variances, equality of means and equality of proportions of two populations. .7 Testing for independence of factors: Normal and Chi-Square methods. .8 Testing for goodness of fit of data to a probabilistic model: Chi-Square test. .9 Linear regression: Inference about the utility of a linear regression model. Covariance and correlation coefficient. Confidence and prediction intervals. .10 Weibull distribution: estimating the distribution's parameters
